

The insulation material used in the following products is made from polyester film 0.125 mm.

Special tools are necessary for double side insulation covers. Tools can also be set up for additional versions of „double side insulation covers“ for larger quantities. Single and separated side insulation covers are normally produced without special tooling, thus also the versions not in stock can be delivered quickly.

When using single or double side insulation covers 2 side insulation covers per bobbin are required. 4 side insulation covers per bobbin are generally needed when using separated insulation covers. If only one chamber has to be covered, 2 side insulation covers per bobbin will suffice.

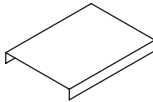

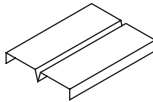

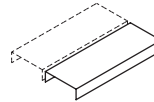

Unsymmetrical versions of double side insulation covers are listed separately, a respective order text is required.

Example for ordering:

single side insulation covers EI 48/16,6 Art.No. 4022 for bobbin EI 48/16,8/1 ST Wz 6435/1 ST

double side insulation covers M 85/33,5a for bobbin M 85/33,5/2 LP Wz 6596a/2 LP

separated side insulation covers EI 120/41,8a Art.No. 4068 for bobbin EI 120/41/2 OD Wz 6250a/2 OD
